Assumptions Used in Arriving at Fiscal Estimate:

This bill creates a sales and use tax exemption for clothing and shoes that cost less than \$100 per item.

Based on information from the U.S. Department of Commerce Survey of Current Business, August 1998, expenditures for clothing and shoes were \$278 billion in 1997. According to DRI/McGraw Hill's January 1999 forecast, consumption of clothing and shoes is projected to increase by 12.4% from 1997 through 1999 to approximately \$312 billion. Assuming that Wisconsin's share of clothing and shoe purchases is the same as Wisconsin's share of U.S. personal income (1.85%), in 1999 the state's share of clothing and shoe purchases would be \$5.8 billion (\$312 billion x .0185).

There are no data available indicating the share of sales attributable to clothing costing less than \$100. For purposes of this fiscal note it is assumed that 75% of total sales would be of clothes costing less than this threshold. Using this assumption, sales eligible for the exemption are estimated to be \$4.4 billion, and the 5% state sales tax foregone on these sales would be \$218 million. This estimate is highly sensitive to the assumption as to the portion of sales attributable to clothing and shoes costing less than \$100; if it is assumed that this portion equals 80%, rather than 75%, of total sales, the estimated revenue loss would be \$14 million higher.

In 1997, county and stadium sales taxes were 6.25% of state sales taxes. Assuming this percentage remains applicable in 1999, the loss in local sales tax revenues would be \$13.6 million.
